|-------------------------|-----------------------|
| • Responsive web design | • Attention to detail |
| • Problem-solving       | • Team collaboration  |

## Projects

### Portfolio:

created a website for my personal portfolio to highlight my experiences, accomplishments, and abilities as a frontend developer. React is used in the website's construction to facilitate effective component-based development and provide a dynamic and adaptable user experience. For styling, Tailwind CSS was used.

**Responsive Design:** Ensured compatibility with various devices and screensizes for the best user experience.

**Interactive Components:** Leveraged Flowbite to add visually appealing and interactive elements such as navigation bars, modals, and buttons.

**Project Showcase:** I created a dedicated section to highlight my important projects, including descriptions, tech stacks, and links to live demos and source code.

### OCHI:

Ochi is a web tool that allows users to generate professional presentations to pitch to investors. The platform is developed with React, which provides a dynamic and responsive user interface. Tailwind CSS is utilized for styling.

**Technologies** - React Js, Tailwind CSS, FramerMotion
